## TECHNICAL SKILLS

---

**Programming Languages:** Core Java, Python

**Backend:** Springboot, Spring JPA

**Database:** PostgreSQL MongoDB , SQL

**Tools:** Git, GitHub, VS Code, Postman, Bash-Shell, Docker, Kubernetes

**Core Subjects:** DSA, OOP'S, Operating Systems, Computer Networks, DBMS

## WORK EXPERIENCE

---

### Sindwi Engineers PVT LTD.

Software Engineer

Remote

SEP 2025

- Built **5 backend services** and RESTful APIs using Java and Spring Boot, enabling reliable communication across internal platforms and improving workflow automation.
- Architected and integrated **3 database models** in PostgreSQL, supporting over **1,000 daily API calls** with consistent response times and secure data handling.
- Streamlined deployment workflows by packaging backend services into Docker containers and setting up automated test pipelines, cutting manual release time by **40%**.
- Implemented Spring Security and JWT-based role authorization, improving access **control accuracy by 95%** and reducing unauthorized **access attempts by over 40%** across backend services.

## PROJECTS

---

### Real - Time Stock Data Pipeline - [GitHub](#)

Tech Stack: Java, Spring Boot, Apache Kafka, Docker, Microservices

AUG 2025

- \* Designed and deployed a high-throughput real-time market data pipeline using Spring Boot and Kafka, processing 1,247+ events/min with 98.7% delivery accuracy across 8 live stock feeds.
- \* Optimized microservice performance by restructuring Kafka topic partitions and Dockerized services, reducing memory utilization by 43% and accelerating service startup by 67%.

### Huffman File Compression System - [GitHub](#)

Tech Stack: Core Java, Data Structures and Algorithms, OOP's

MAY 2025

- \* Developed a custom Huffman-based compression engine in Java, achieving up to 50% reduction in file size and a 30% gain in compression/decompression speed over baseline methods.
- \* Strengthened system correctness with JUnit-driven automated test suites, delivering 100% code coverage and reducing debugging and regression errors by 25%.

### Full-Stack Enterprise Operations Platform - [GitHub](#)

Tech Stack: Core Java, Spring Boot, Spring Security, RESTful APIs , PostgreSQL.

JUL 2024

- \* Built an enterprise-grade workflow automation platform using Spring Boot and React, increasing process efficiency by 35% and reducing manual operational overhead by 40%.
- \* Implemented secure multi-role authentication and authorization with Spring Security + JWT, improving access governance and safeguarding proprietary business data.

## EDUCATION

---

### Chandigarh University

Bachelor of Engineering - Computer Science & Engineering

7.5/10

May 2025

## ACHIEVEMENTS AND CERTIFICATIONS

---

- Oracle Cloud Infrastructure Certified Developer Professional [Link](#)
- Oracle Cloud Infrastructure Certified DevOps Professional [Link](#)
- Probability and Statistics [ELITE] - IIT Kharagpur [ NPTEL ] [Link](#)
- Recognized for Leading & contributing to **4+ IEEE** software projects using Java and REST APIs, supporting **100+ users** and improving delivery efficiency by **20%**.
- Collaborated cross-functionally with engineers and stakeholders to analyze requirements, communicate technical insights, and deliver data-driven solutions that improved system reliability and project execution efficiency.
